CAREER OBJECTIVE

To continue advancing in my professional career by effectively applying my experience and skills to deliver meaningful results and contribute to the company's success. I am a dedicated and reliable team player with a strong sense of purpose, consistently striving to achieve organizational goals while expanding my knowledge and capabilities.

INDUSTRIAL EXPERIENCE (4.3 YEARS)

SOFTWARE DEVELOPER *08/2021 to Present*
Indium Software Pvt. Ltd | Chennai

GameMon - Feb 2022 to Present

- The project aim is to provide a cost-effective in-house Desktop application tool for Game-testing team.
- It captures the device hardware and software usage information while running a game or an application in GameMon application.
- Worked as a Backend developer and wrote APIs (Restful) for the project.
- Also worked on DB design and creation.
- I did some work on making tech Documents and Presentation.

- Took responsibility on creating and maintaining backend server, by means got good grip on few concepts in AWS cloud computing.
- Also worked on Research in requirement freezing phase.

BookIt - Jul 2022 to nov 2022

- This is also an in-house project developed for booking conference rooms in the indium owned buildings.
- I grabbed the opportunity to work on front end engineering as one of my interest in full stack development.
- Worked on developing few webpages for the BookIt application with react.js technology.
- Got exposure in front end engineering and brush-up my web technology skills.

Early Autism Service (EAS) - Aug 2021 to Jan 2022

- The primary aim of project is to provide the best way to develop the potential through proactive, personalized ABA therapy in an autistic child.
- It mainly captures the children's activities in many aspects like Behavior Planning, Fine and Gross Motor Skills, Language and Communication, Play Skill and Social Skills through the forms filled by Clinical Professionals.
- It provides detailed reports and suggestions for further therapy.
- Worked on Backend Development (Ruby on Rails) for this project. I have learnt API development in ROR and done some major EAS API modifications.
- Also worked on documenting the API's wherein I used swagger for making docs.

FULL STACK DEVELOPER INTERN *02/2020 to 06/2020*
QuadWave Consulting Pvt. Ltd | Bangalore

Incident Reporting System (Internship Project)

- The primary aim of project is to record the precise facts of an incident while it is still fresh on everybody's mind while filling up a form and to provide immediate security alert for emergencies.
- Capturing first had information from ground zero of the Incident and also seamless tracking and notification of Incidents.
- Worked on company tool called "Amper", a software application development tool to create module of an incident reporting root module.
- Designed and developed sub-modules for Assault, Crime, Fire and Medical incident reporting forms as a full-stack developer.
- Created tech-packs and detailed project report.
